

# PROPAGANDA POSTER FINAL

## *Directions:*

You will create a propaganda poster or political cartoon based on the course materials. It can be any issue, domestic or global. You will take the role of a media artist who will represent either side of the political/social argument.

When communicating the meaning of your poster remember that it is intended to evoke emotion to the reader/observer. You should emphasize symbolism when creating your poster. The less you write the better. A propaganda poster should often get the meaning across to the observer before he or she gets a chance to read what it says.

## **Your poster should include the following things:**

1. Poster with design/artwork created by you.
2. Paragraph on the back of poster that explains what the various images represent **and** what you want the piece of propaganda to do for your country. Explain whether the poster is for/against your topic -where would we find it?

**\*\*Students who do an outstanding/creative/original job may receive extra credit☺**

## **Warning:** Do not do the following!

This project is intended to be solely your idea. DO NOT copy off other propaganda posters or the internet.
